Resolution 47 - Establishment of Study Group on Digital Content Management and Protection

JTC 1 notes the standardization activity within JTC 1, ISO, IEC and in many consortia in the area of digital content management and protection. This a challenging area for standardization to cover a wide spectrum of technical, user, application needs. There is currently no activity to survey global standardization activities in this area and consider feasibility for coordination.

To this end, JTC 1 establishes a Study Group on Digital Content Management and Protection to understand the current state of standardization and to explore a possible role for JTC 1. The Study Group will have the following terms of reference:

- 1) Provide a definition for Digital Content Management and Protection
- 2) Assess, via an inventory, the current state of standardization in DCMP within JTC 1 and in other SDOs and consortia
- 3) Understand and document market/application segments, user requirements and the challenges to be addressed
- 4) Deliver recommendations to JTC 1 on possible actions to be taken
- 5) Meetings of the group may be via face-to-face or preferably by electronic means

Membership in the Study Group will be open to:

- 1) JTC 1 National Bodies, Liaisons, AROs and PAS submitters
- 2) JTC 1 SCs
- 3) Members of ISO and IEC central offices
- 4) Invited SDOs and consortia that are engaged in standardization in DCMP

In addition, the Convener may invite experts with specific expertise in the field

JTC 1 appoints Mr. Lin GAO as Convener and Mr. Linpeng GAO as Secretary for the Study Group of DCMP and instructs the JTC 1 Secretariat to issue a call for participants for the Study Group.

JTC 1 instructs the Study Group Convener to provide a report on the activities of the Study Group at the 2009 JTC 1 Plenary meeting in Israel.
